

Bulldog 770 Studio

770W Bass Amplifier

Great British tone with Hi-Headroom - used by touring and recording artists, the legendary Bulldog 770 amplifier has kept it's original analogue preamp and now features a newly engineered lightweight 800W (@ 8 ohms) class D output section, graphic EQ, DI XLR and Line Out, multiple speaker outs, and rugged construction. The Studio's metal housing also accepts rack ears for rack mounting (3U). This 'Hiwatt Clean' Bass amp is time tested, and ready to hit the road!

Feature Overview

- Analogue clear-voiced preamp
- 2 band EQ for tone control and a bypassable 7 band Graphic EQ for further surgical sculpting.
- Active and Passive input levels to match your signal chain volume.
- Bypassable transparent Limiter circuit for compression and maximum headroom.
- XLR and Line Out for transparent Direct signal.
- British Engineered
- Solid metal shell for road durability in a lightweight format.
