Custom Speaker Cab w/ 1x12" Fane Speaker

The difference between sounding good and sounding great might just be your Speaker Cab. Often overlooked but just as important as a great amplifier and guitar/bass, is the Cab you are playing through. Historic Hiwatt construction methods and dimensions can withstand decades of touring as well as handle the extreme SPL's (sound pressure levels) our Hi-Wattage Speakers produce. These Hiwatt Cabinets are Engineered to resonate 'in all the best ways' making an important contribution to the overall tone produced.

Feature Overview

- Historically accurate dimensions and materials.
- 18mm Birch Ply for sound resonance and acoustic properties.
- Tour ready with Legendary Hiwatt durability.
-  Engineered since 1966 to handle more volume and more power without "shaking".
- Traditional engraved Traffolyte Hiwatt badge and hand-punched and hand-numbered Serial Plate.
- Exclusively Engineered and manufactured Speaker pairings.
- Speakers mounted low in the Cabinet for increased low-end response.
- Handwired & professionally tested in the  Hiwatt Custom Shops.
